SUMMARY

Final-year Information Technology undergraduate who builds and ships working software rather than just studying it — from a multi-agent AI travel planner running on LangGraph and FastAPI to a full production MERN app with authentication and analytics. Comfortable across the stack, with a solid grounding in data structures, algorithms, and core CS fundamentals. Looking for SDE + AI role.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS

Web & Backend: React.js, Node.js, Express.js, FastAPI, Jinja2, REST APIs

AI / Generative AI: Machine Learning, LangGraph, LangChain, Groq LLM, Model Context Protocol (MCP), Prompt Engineering, Scikit-learn, NumPy, Pandas, OpenCV

Databases: MySQL, MongoDB, MongoDB Atlas, PostgreSQL, Redis

Tools & DevOps: Git, GitHub, Docker, Docker Compose, Postman, VS Code, Vercel, Render

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

PROJECTS

TripMind AI — AI-Powered Travel Planner

Python, FastAPI, LangGraph, LangChain, Groq, MCP, PostgreSQL, Redis, Docker | Live Demo | GitHub

- Built and deployed an AI travel-planning app that turns natural-language requests into structured, personalized itineraries using a LangGraph multi-agent workflow with dedicated destination, flight, hotel, weather, and itinerary agents.
- Developed the backend with FastAPI, integrating Groq LLM inference through LangChain and MCP-based tool connections for external travel research.
- Added PostgreSQL-backed workflow checkpointing and Redis caching to persist state and reduce repeated external API calls.
- Containerized the application with Docker and Docker Compose and deployed it to Vercel with environment-based configuration.

AppliJobTrack — Full-Stack Job Application Tracker

JavaScript, React, Node.js, Express, MongoDB | Live Demo | GitHub

- Built and deployed a full-stack MERN app to track job applications across companies and stages, with a Kanban-style workflow from Saved through Applied, OA, Interview, Offer, and Accepted.
- Implemented JWT authentication with bcrypt password hashing, protected API routes, and user-level data isolation.
- Designed a RESTful Express backend with Mongoose models and MongoDB Atlas persistence, plus a React and Recharts dashboard for application analytics.
- Deployed the frontend and backend independently on Render, handling CORS and production API configuration.

EXPERIENCE

Python Development Intern — Cognifyz Technologies Dec 2025 – Jan 2026

- Built and improved Python applications through tiered technical challenges, strengthening core programming and problem-solving skills.
- Identified application issues, implemented fixes, and validated functionality to improve reliability and code quality.
- Coordinated with mentors and peers to clarify requirements and resolve blockers while managing tasks independently.

Volunteer — DIPEX Pune Events

- Coordinated with attendees, vendors, and team members to execute technical and academic events under time constraints.

ACHIEVEMENTS & CERTIFICATIONS

- State-Level Selection, OpenAI Academy x NxtWave Buildathon — built and pitched “LensCode Bharat”
- Programming Fundamentals Using Python — Infosys Springboard

EDUCATION

B.E. Information Technology — JSPM's JSCOE, Hadapsar, Pune — CGPA 8.0/10 2023 – 2027

Higher Secondary Education — Yeshwant Mahavidyalaya — 55.17% 2021 – 2023

Secondary Education — Tiny Angels School — 92.40% 2020 – 2021

LANGUAGES

English (Professional) | Hindi (Fluent) | Marathi (Native)
